SKILLS

Programming
- TypeScript, JavaScript
- Python

Frontend
- React, Next.js, Redux
- Angular, React Native

Backend & Data
- Node.js, GraphQL
- Microservices
- Kafka, RabbitMQ
- PostgreSQL, MongoDB

Cloud
- AWS, AWS Bedrock
- Azure

AI
- AI Agents, OpenAI

Real-time
- WebRTC

LANGUAGES

English
C1 (fluent)

Ukrainian
Native (fluent)

PROFILE

Full-Stack Engineer with 13+ years of experience (since 2013) engineering high-scale platforms across media streaming, e-commerce, travel, and real-time communication. Proven track record of delivering business-critical systems at companies including Microsoft, Pipedrive and Docler.

Currently driving organization-wide AI adoption beyond basic code completion. I build and integrate agentic workflows, and establish "golden path" scenarios for Engineering, QA, and Management to systematically elevate development velocity and system quality.

WORK EXPERIENCE

Level Access
JAN 2025 - PRESENT

Senior Full Stack Developer | Remote

Stack: TypeScript, Python, AWS (Bedrock), Angular, Azure, AI Agents, OpenAI, Kafka, RabbitMQ, PostgreSQL, MongoDB, Microservices

- Build scalable full-stack applications, accessible front-end interfaces, and cloud-native microservices on AWS and Azure to drive AI-powered Web Accessibility (a11y) solutions.
- Design robust web crawlers to audit multi-platform environments.
- Integrate automated AI workflows using AWS Bedrock, OpenAI, and AI agents.
- Replace manual audit processes with intelligent event-driven pipelines, significantly accelerating accessibility analysis and UI delivery for clients.

Docler Holding Luxembourg
MAY 2020 - SEP 2025

Staff Frontend Engineer | Luxembourg, Remote

Stack: TypeScript, JavaScript, Node.js, React, Redux, Next.js, GraphQL, Microservices

- Architected and delivered complex, business-critical front-end solutions for high-scale web and streaming platforms serving thousands of users.
- Led end-to-end delivery of high-impact UI features, unblocking teams, and driving user-centric improvements across the streaming domain.
- Conducted deep debugging and root-cause analysis to fix critical production issues; led major refactoring and tech-debt reduction initiatives that reduced bundle size and improved page load speed.
- Developed ML-based tooling and integrated AI-assisted workflows (such as automated PR analysis and reviews), adopted by 4 of 8 teams, to boost engineering velocity and code quality.
- Conducted in-depth competitor analysis within streaming media; evaluated emerging web technologies and facilitated tech adoption and knowledge sharing across teams.

ZAKHAR DOLOZHEVSKIY

EDUCATION

O.M. Beketov National University of Urban Economy in Kharkiv
Master's Degree
2008 - 2013

CERTIFICATIONS

AWS Certified Solutions Architect - Associate (SAA)
Amazon Web Services (AWS)
Issued Nov 2019
Credential ID:
GVNB1PGKFFBQQM9E

WORK EXPERIENCE

SoftServe FEB 2019 - MAY 2020
Technical Leader | Kharkiv, Ukraine

- Led front-end and full-stack teams of 4-5 developers; drove agile processes, code reviews, mentoring, and cross-functional communication.
- Contributed to POCs, documentation, RFCs, pre-sales, and scope negotiations with clients.
- Delivered a refactored issue-tracking SPA built with GraphQL and a micro front-end architecture (Ruby on Rails, React, MobX, SSR).
- Delivered a high-performance SEO-optimized landing platform for a travel company (Node.js, React, Redux, GraphQL, microservices).

Microsoft SEP 2018 - FEB 2019
Software Engineer | Tallinn, On-site

- Enhanced the web calling experience as a JS/TS expert on the web media core team.
- Implemented reliable, cross-platform solutions for video conferencing, screen sharing, and media stream transfers; integrated with various third-party libraries and applications.
- Worked on a core calling component used across multiple Microsoft products, including Skype, Microsoft Teams, Office 365, and other internal applications.

Pipedrive JUL 2017 - SEP 2018
Senior Full Stack Developer | Tallinn | promoted from Senior Front End

- Developed front-end services from scratch and led the refactoring of legacy application components; worked with PHP and Node.js on the back end and implemented a data migration module.
- Mentored front-end team members, contributed actively to the front-end guild, and drove organization-level technical decisions focused on front-end rendering performance and UX.

EARLIER EXPERIENCE

Brightgrove Ltd. APR 2016 - JUL 2017
Software Engineer (FE) | Kharkiv, Ukraine

Prepared a legacy front-end application for redesign into a SPA (React, Redux), architected the new structure, established a testing strategy, and built a large-scale Angular 2 and Dart application.

EPAM Systems SEP 2014 - APR 2016
Software Engineer | Kharkiv, Ukraine, On-site

Contributed to two large-scale e-commerce projects, established a cross-team code review process, and developed an indoor navigation app (Ionic, iBeacons, Node.js) presented at an internal knowledge-sharing conference.

G5 Entertainment AB NOV 2013 - AUG 2014
QA Engineer | Kharkiv, Ukraine, On-site

Organized and streamlined the software testing process for mobile arcade and quest games; developed testing documentation that resulted in faster testing iterations and a shorter build validation cycle.
